INDEX TO AUTHORS

A

Abbott, Lynn DeForrest, Jr., and **Lewis, Howard B.** Comparative studies of the metabolism of the amino acids. IX. Glycine precursors. Availability of N-ethylglycine and glycolic acid for the synthesis of hippuric acid by the rabbit, 535

Adolph, William H., and **Liang, Chih-Chuan.** Calcium in the alimentary tract of the rat, 517

Allen, Frank Worthington, and **Eiler, John J.** The action of crystalline ribonuclease on ribonucleic acid, 757

Almquist, H. J. See *Stokstad, Almquist, Mecchi, Manning, and Rogers,* 373

Astwood, E. B., and **Jones, G. E. Seegar.** A simple method for the quantitative determination of pregnanediol in human urine, 397

B

Bacher, F. A. See *Trenner and Bacher,* 745

Balls, A. K. See *Jansen and Balls,* 459

Barker, H. A. Studies on the methane fermentation. V. Biochemical activities of *Methanobacterium omelianskii,* 153

Barker, S. B. Acetaldehyde in mammalian red blood cells, 783

Barnum, Cyrus P. See *MacKay, Wick, and Barnum,* 183

Barron, E. S. Guzman, Dick, George F., and **Lyman, Carl M.** The chemical nature of scarlet fever toxin, 267

— and **Friedemann, Theodore E.** Studies on biological oxidations. XIV. Oxidations by microorganisms which do not ferment glucose, 593

Baumann, C. A. See *Berger, Johnson, and Baumann,* 389

Berger, Julius, Johnson, Marvin J., and **Baumann, C. A.** Enzymatic hydrolysis of *d*-peptides, 389

Bergström, Sune. See *Wintersteiner and Bergström,* 785

Bliss, Sidney. Increased excretion of urinary ammonia in the dog following the intravenous injection of both natural and unnatural forms of certain amino acids, 217

Blix, Gunnar. Electrophoresis of lipid-free blood serum, 495

—, **Tiselius, Arne,** and **Svensson, Harry.** Lipids and polysaccharides in electrophoretically separated blood serum proteins, 485

Bowman, Donald E. Some of the oxidation-reduction properties of the chorionic gonadotropic hormone, 293

Brand, Florence C. See *Sperry and Brand,* 377

Brown, George Bosworth, and **du Vigneaud, Vincent.** The synthesis of S-(β-amino-β-carboxyethyl)-homocysteine, 611

Brown, Herman, and **Kolmer, John A.** Studies on the chemical constitution of the antigenic substance in alcoholic tissue extracts concerned in the serum diagnosis of syphilis, 525

Bueding, Ernest, Stein, Martin H., and **Wortis, Herman.** The formation of pyruvic acid following glucose ingestion in man, 793

Bull, Henry B. Osmotic pressure of egg albumin solutions, 143

C

Campbell, H. L. See *Lanford, Campbell, and Sherman,* 627

Carroll, W. R., and **Stier, T. J. B.** The nature of the stimulation of yeast respiration by chloroform-preserved cytochrome *c* extracts, 787

Chaikoff, I. L. See *Entenman, Chaikoff, and Montgomery,* 699

—. See *Fries, Entenman, Changus, and Chaikoff,* 303

—. See *Montgomery, Entenman, Chaikoff, and Nelson,* 693

Changus, G. W. See *Fries, Entenman, Changus, and Chaikoff,* 303

Christensen, Bert E., West, Edward S., and **Dimick, Keene P.** A simple apparatus and procedure for determination of amino acids by the ninhydrin reaction, 735

Christensen, Halvor N., and **Ross, William F.** Carbon suboxide and proteins. II. The determination of malonic acid, 101

—. See *Ross and Christensen,* 89

Cohn, Mildred, Irving, George W., Jr., and **du Vigneaud, Vincent.** The amphoteric nature of the pressor principle of the posterior lobe of the pituitary gland, 635

Colowick, Sidney P., and **Kalckar, Herman M.** An activator of the hexokinase system, 789

—, —, and **Cori, Carl F.** Glucose phosphorylation and oxidation in cell-free tissue extracts, 343

Conant, James B., Cramer, Richard D., Hastings, A. Baird, Klemperer, Friedrich W., Solomon, A. K., and **Vennesland, Birgit.** Metabolism of lactic acid containing radioactive carboxyl carbon, 557

Consolazio, W. V., and **Dill, D. B.** The determination of sodium, 587

Cori, Carl F. See *Colowick, Kalckar, and Cori,* 343

Cramer, Richard D., and **Kistiakowsky, G. B.** The synthesis of radioactive lactic acid, 549

—. See *Conant, Cramer, Hastings, Klemperer, Solomon, and Vennesland,* 557

D

Davis, Orris L. See *Lingane and Davis,* 567

Dean, R. B. The determination of chloride in single isolated muscle fibers, 113

Deuel, Harry J., Jr. See *Harper and Deuel,* 233

Dick, George F. See *Barron, Dick, and Lyman,* 267

Dill, D. B. See *Consolazio and Dill,* 587

Dimick, Keene P. See *Christensen, West, and Dimick,* 735

Doster-Virtue, Mildred E. See *Virtue and Doster-Virtue,* 227

DuBois, Delafield. An apparatus for the study of rapid chemical reactions, 123

E

Ecker, E. E. See *Pillemer and Ecker,* 139

Eiler, John J. See *Allen and Eiler*, 757

Engel, Lewis L., Thorn, George W., and **Lewis, Roger A.** The urinary excretion of steroid compounds. I. Normal male subjects, 205

Entenman, C., Chaikoff, I. L., and **Montgomery, M. Laurence.** The rôle of the external secretion of the pancreas in lipid metabolism. The influence of daily ingestion of pancreatic juice upon the level of blood lipids in completely depancreatized and duct-ligated dogs maintained with insulin, 699

—. See *Fries, Entenman, Changus, and Chaikoff*, 303

—. See *Montgomery, Entenman, Chaikoff, and Nelson*, 693

F

Fashena, Gladys J., and **Stiff, Henry A.** On the nature of the saccharoid fraction of human blood. II. Identification of glucuronic acid, 21

Feeney, R. E. See *Strong, Feeney, Moore, and Parsons*, 363

Fieser, Louis F., Tishler, Max, and **Sampson, W. L.** Vitamin K activity and structure, 659

Folch, Jordi, and **Schneider, Howard A.** An amino acid constituent of ox brain cephalin, 51

Friedemann, Theodore E. See *Barron and Friedemann*, 593

Fries, B. A., Entenman, C., Changus, G. W., and **Chaikoff, I. L.** The deposition of lipids in various parts of the central nervous system of the developing rat, 303

G

Glick, David. Some additional observations on the specificity of cholinesterase, 357

Grauer, Robert C. See *Saier, Warga, and Grauer*, 317

Green, Leila S. See *Ross and Green*, 105

Greenberg, David M. See *Winnick and Greenberg*, 429

Greenblatt, I. J. Guanidinuria, 791

Greenstein, Jesse P., Jenrette, Wendell V., Mider, G. Burroughs, and **White, Julius.** The relative arginase activity of certain tumors and normal control tissues, 795

Guerrant, Ralph E. See *Hogan, Powell, and Guerrant*, 41

H

Halverstadt, I. F. See *Kumler and Halverstadt*, 765

Harper, Harold A., and **Deuel, Harry J., Jr.** The urinary pyruvate in thiamine deficiency, 233

Hastings, A. Baird. See *Conant, Cramer, Hastings, Klemperer, Solomon, and Vennesland*, 557

Haurowitz, Felix. The prosthetic group of sulfhemoglobin, 771

Heegaard, Erik. See *Horowitz and Heegaard*, 475

Heidelberger, Michael. See *Karjala and Heidelberger*, 189

Heller, V. G. See *Mac Vicar and Heller*, 643

Henny, George C. See *Spiegel-Adolf, Seibert, and Henny*, 503

Hogan, Albert G., Powell, Eugene L., and **Guerrant, Ralph E.** Anemia from lysine deficiency in deaminized casein, 41

Hogden, Corinne G. See *Robinson and Hogden*, 239

Hoover, Sam R. See *Lineweaver and Hoover*, 325

Horowitz, N. H., and **Heegaard, Erik.** Experiments on the carboxylase of pea roots, 475

Hottle, G. A., Lampen, J. O., and **Pappenheimer, Alwin M., Jr.** Biotin as a growth factor for C203S strain of hemolytic streptococcus, Group A, 457

Howard, Mary. See *Brown and Kolmer,* 525

I

Irving, George W., Jr. See *Cohn, Irving, and du Vigneaud,* 635

J

Jacobsen, C. F. See *Linderstrøm-Lang and Jacobsen,* 443

Jansen, E. F., and **Balls, A. K.** Chymopapain: a new crystalline proteinase from papaya latex, 459

Jenrette, Wendell V. See *Greenstein, Jenrette, Mider, and White,* 795

Johnson, Marvin J. Isolation and properties of a pure yeast polypeptidase, 575

—. See *Berger, Johnson, and Baumann,* 389

Jones, G. E. Seegar. See *Astwood and Jones,* 397

K

Kalckar, Herman M. See *Colowick and Kalckar,* 789

—. See *Colowick, Kalckar, and Cori,* 343

Karjala, Sulo A., and **Heidelberger, Michael.** Specific and nonspecific cell polysaccharides of an avian strain of tubercle bacillus, 189

Kistiakowsky, G. B. See *Cramer and Kistiakowsky,* 549

Klein, Daniel. The determination of pyruvic acid in blood in the presence of acetoacetic acid, 311

Klemperer, Friedrich W. See *Conant, Cramer, Hastings, Klemperer, Solomon, and Vennesland,* 557

Kolmer, John A. See *Brown and Kolmer,* 525

Kuether, Carl A., and **Smith, Arthur H.** The absorption and fate of free citric acid in the rat, 647

Kuiken, K. A. See *Schultze and Kuiken,* 727

Kumler, W. D., and **Halverstadt, I. F.** The acid strength of bile acids, 765

Kuna, Martin, Ovakimian, G., and **Levene, P. A.** The correlation of the configurations of α-aminophenylacetic acid and of alanine, 337

L

Lampen, J. O. See *Hottle, Lampen, and Pappenheimer,* 457

Lanford, Caroline Sherman, Campbell, H. L., and **Sherman, H. C.** Influence of different nutritional conditions upon the level of attainment in the normal increase of calcium in the growing body, 627

Langley, Wilson D. Urinary histidine. Determination of histidine in urine. Histidine in normal and in pregnancy urines, 255

Levene, P. A. Methylation of hexosamines, 29

—. See *Kuna, Ovakimian, and Levene,* 337

Lewis, Howard B. See *Abbott and Lewis,* 535

Lewis, Roger A. See *Engel, Thorn, and Lewis,* 205

Liang, Chih-Chuan. See *Adolph and Liang,* 517

Linderstrøm-Lang, K., and **Jacobsen, C. F.** On the properties of 2-methylthiazoline and their relation to the protein problem, 443

Lineweaver, Hans, and **Hoover, Sam R.** A comparison of the action of crystalline papain on native and urea-denatured proteins, 325

Lingane, James J., and **Davis, Orris L.** Polarographic determination of riboflavin (vitamin B_2) and other vitamin B factors, 567

Lischer, Carl F. See *Martin and Lischer,* 169

Lockhart, E. E., and **Potter, V. R.** Studies on the mechanism of hydrogen transport in animal tissues. II. Reactions involving cytochrome *c,* 1

Luckey, Freeman. See *Robinson, Stewart, and Luckey,* 283

Lukens, Francis D. W. See *Stadie, Zapp, and Lukens,* 63, 75

Lyman, Carl M. See *Barron, Dick, and Lyman,* 267

Lynch, Elsa R. See *Brown and Kolmer,* 525

M

MacKay, Eaton M., Wick, Arne N., and **Barnum, Cyrus P.** Hepatic glycogen formation by the isomers of alanine, 183

MacVicar, Robert, and **Heller, V. G.** Blood chloride and phosphorus content as affected by adrenalin injection, 643

Manning, P. D. V. See *Stokstad, Almquist, Mecchi, Manning, and Rogers,* 373

Martin, Gustav J., and **Lischer, Carl F.** Polyhydroxyanthraquinones affecting coagulation time in vitamin K deficiency, 169

Mecchi, E. See *Stokstad, Almquist, Mecchi, Manning, and Rogers,* 373

Mider, G. Burroughs. See *Greenstein, Jenrette, Mider, and White,* 795

Montgomery, M. Laurence, Entenman, C., Chaikoff, I. L., and **Nelson, C.** The rôle of the external secretion of the pancreas in lipid metabolism. The prevention of fatty livers in depancreatized and duct-ligated dogs by the daily feeding of fresh pancreatic juice, 693

—. See *Entenman, Chaikoff, and Montgomery,* 699

Moore, Barbara. See *Strong, Feeney, Moore, and Parsons,* 363

Morrison, Dempsie B., and **Williams, Edward F., Jr.** The solubility and titration of hemin and ferrihemic acid, 461

Moss, A. R. The conversion of β-phenyllactic acid to tyrosine in normal rats, 739

N

Nelson, C. See *Montgomery, Entenman, Chaikoff, and Nelson,* 693

O

Ovakimian, G. See *Kuna, Ovakimian, and Levene,* 337

Zapp, John A., Jr. See *Stadie, Zapp, and Lukens*, 63, 75

INDEX TO SUBJECTS

A

Acetaldehyde: Blood cells, red, *Barker*, 783

Acetic acid: α-Aminophenyl-, alanine and, configurational correlation, *Kuna, Ovakimian, and Levene*, 337

Liver, non-formation, diabetes, *Stadie, Zapp, and Lukens*, 75

Acetoacetate: Kidney, carbohydrate synthesis, diabetes, *Stadie, Zapp, and Lukens*, 63

Acetoacetic acid: Blood pyruvic acid determination, effect, *Klein*, 311

Adrenalectomy: Kidney tissue metabolism, effect, *Russell and Wilhelmi*, 713

Adrenalin: Blood chloride, injection effect, *MacVicar and Heller*, 643

— phosphorus, injection effect, *MacVicar and Heller*, 643

Alanine: α-Aminophenylacetic acid and, configurational correlation, *Kuna, Ovakimian, and Levene*, 337

Isomers, liver glycogen formation, effect, *MacKay, Wick, and Barnum*, 183

Albumin: Egg. *See* Egg albumin

Alimentary tract: Calcium, *Adolph and Liang*, 517

Alkalosis: Blood serum calcium and protein, effect, *Yannet*, 409

Amino acid(s): Brain cephalin, *Folch and Schneider*, 51

Carbon suboxide and, reaction, *Ross and Green*, 105

Amino acid(s)—*continued:*

Determination, ninhydrin reaction, apparatus, *Christensen, West, and Dimick*, 735

Metabolism, *Abbott and Lewis*, 535

Urine ammonia excretion, injection effect, *Bliss*, 217

Aminophenylacetic acid: α-, alanine and, configurational correlation, *Kuna, Ovakimian, and Levene*, 337

Ammonia: Urine, excretion, amino acid injection effect, *Bliss*, 217

Androsterone: Calibration curves, *Saier, Warga, and Grauer*, 317

Dehydroiso-, calibration curves, *Saier, Warga, and Grauer*, 317

Anemia: Deaminized casein-produced, lysine relation, *Hogan, Powell, and Guerrant*, 41

Anthraquinone(s): Polyhydroxy-, blood coagulation, vitamin K deficiency, effect, *Martin and Lischer*, 169

Antigen: Tissue extract, chemical constitution, blood serum syphilis diagnosis, *Brown and Kolmer*, 525

Apparatus: Amino acid determination, ninhydrin reaction, *Christensen, West, and Dimick*, 735

Chemical reactions, rapid, study, *DuBois*, 123

Arginase: Tissue, normal, *Greenstein, Jenrette, Mider, and White*, 795

Tumors, *Greenstein, Jenrette, Mider, and White*, 795

B

Bacillus: Tubercle. *See* Tubercle bacillus

Bacterium: *See also Methanobacterium omelianskii*

Bile acid(s): Acid strength, *Kumler and Halverstadt*, 765

Biotin: Streptococcus, hemolytic, growth factor, *Hottle, Lampen, and Pappenheimer*, 457

Blood: Carbon monoxide determination, *Roughton*, 617
Chloride, adrenalin injection effect, *MacVicar and Heller*, 643
Coagulation, vitamin K deficiency, polyhydroxyanthraquinones, effect, *Martin and Lischer*, 169
Glucuronic acid, saccharoid relation, *Fashena and Stiff*, 21
Lipids, pancreatectomy and duct ligation with insulin, pancreatic juice ingestion effect, *Entenman, Chaikoff, and Montgomery*, 699
Phosphorus, adrenalin injection effect, *MacVicar and Heller*, 643
Pyruvic acid, determination, acetoacetic acid effect, *Klein*, 311
Riboflavin, *Strong, Feeney, Moore, and Parsons*, 363
Saccharoid, *Fashena and Stiff*, 21

Blood cell(s): Red, acetaldehyde, *Barker*, 783

Blood serum: Calcium and protein relationship, alkalosis effect, *Yannet*, 409
Lipid-free, electrophoresis, *Blix*, 495
Protein and calcium relationship, alkalosis effect, *Yannet*, 409
Proteins, electrophoretically separated, lipids and polysaccharides, *Blix, Tiselius, and Svensson*, 485
—, phenol red absorption curve, effect, *Robinson and Hogden*, 239
Syphilis diagnosis, tissue extract antigenic substance, chemical constitution, *Brown and Kolmer*, 525

Brain: Cephalin amino acid, *Folch and Schneider*, 51
Cholesterol esterase, *Sperry and Brand*, 377

C

Calcium: Alimentary tract, *Adolph and Liang*, 517
Blood serum, protein and, relationship, alkalosis effect, *Yannet*, 409
Body, nutrition effect, *Lanford, Campbell, and Sherman*, 627

Calcium chloride: Solution, intestine, changes, *Robinson, Stewart, and Luckey*, 283

Calcium lactate: Solution, intestine, changes, *Robinson, Stewart, and Luckey*, 283

Carbohydrate: Kidney acetoacetate, synthesis, diabetes, *Stadie, Zapp, and Lukens*, 63
Liver fat, synthesis, diabetes, *Stadie, Zapp, and Lukens*, 63
Rice factor, *Stokstad, Almquist, Mecchi, Manning, and Rogers*, 373

Carbon monoxide: Blood, determination, *Roughton*, 617

Carbon suboxide: Amino acids and, reaction, *Ross and Green*, 105
Proteins and, *Ross and Christensen*, 89
Christensen and Ross, 101
Ross and Green, 105
— —, reaction, *Ross and Christensen*, 89

Carboxylase: Pea roots, *Horowitz and Heegaard*, 475
Casein: Deaminized, anemia from, lysine relation, *Hogan, Powell, and Guerrant*, 41
Hydrolysate, preparation, choline and homocystine relation, study with, *Welch*, 173
Catalase: Tissue, copper and iron deficiency, effect, *Schultze and Kuiken*, 727
Central nervous system: Lipid deposition, growth effect, *Fries, Entenman, Changus, and Chaikoff*, 303
Cephalin: Brain, amino acid, *Folch and Schneider*, 51
Chemical reaction(s): Rapid, apparatus for study, *Du Bois*, 123
Chloride: Blood, adrenalin injection effect, *Mac Vicar and Heller*, 643
Muscle, determination, *Dean*, 113
Cholesterol: Colloidal solutions, oxygen action, products, *Wintersteiner and Bergström*, 785
Esterase, brain, *Sperry and Brand*, 377
—, liver, *Sperry and Brand*, 377
Choline: Homocystine and, relation, *Welch*, 173
Cholinesterase: Specificity, *Glick*, 357
Chorion: Gonadotropic hormone, oxidation-reduction, *Bowman*, 293
Chymopapain: Papaya latex, *Jansen and Balls*, 459
Citric acid: Free, absorption and fate, *Kuether and Smith*, 647
Coagulation: Blood, vitamin K deficiency, polyhydroxyanthraquinones, effect, *Martin and Lischer*, 169
Complement: Anti-, yeast, *Pillemer and Ecker*, 139
Copper: Tissue catalase, effect, *Schultze and Kuiken*, 727
Cyanide: Cytochrome *c* reduction, effect, *Potter*, 13
Cysteine: S-(β-Amino-β-carboxyethyl)-homo-, synthesis, *Brown and du Vigneaud*, 611
Cystine: Homo-, choline and, relation, *Welch*, 173
Cytochrome: *c*, reactions, hydrogen transport relation, *Lockhart and Potter*, 1
—, reduction, cyanide effect, *Potter*, 13
—, yeast respiration, effect, *Carroll and Stier*, 787

D

Dehydroisoandrosterone: Calibration curves, *Saier, Warga, and Grauer*, 317
Diabetes: Carbohydrate synthesis from kidney acetoacetate, *Stadie, Zapp, and Lukens*, 63
— — — liver fat, *Stadie, Zapp, and Lukens*, 63
Ketone body and liver fatty acid relation, *Stadie, Zapp, and Lukens*, 75
Liver acetic acid, non-formation, *Stadie, Zapp, and Lukens*, 75
Metabolism, intermediary, *Stadie Zapp, and Lukens*, 63, 75

E

Egg albumin: Solutions, osmotic pressure, *Bull*, 143
Enzyme(s): *d*-Peptides, hydrolysis, *Berger, Johnson, and Baumann*, 389
See also Arginase, Carboxylase, Catalase, Cholinesterase, Chymopapain, Esterase, Hexokinase, Papain, Polypeptidase, Proteinase, Ribonuclease

Esterase: Cholesterol, brain, *Sperry and Brand*, 377
—, liver, *Sperry and Brand*, 377
Cholin-, specificity, *Glick*, 357
Ethylglycine: N-, hippuric acid synthesis, availability, *Abbott and Lewis*, 535

F

Fat: Liver, carbohydrate synthesis, diabetes, *Stadie, Zapp, and Lukens*, 63
Fatty acid: Liver, diabetes, ketone body relation, *Stadie, Zapp, and Lukens*, 75
Ferrihemic acid: Solubility and titration, *Morrison and Williams*, 461

G

Glucose: Microorganisms not fermenting, oxidations, *Barron and Friedemann*, 593
Phosphorylation and oxidation, tissue extracts, cell-free, *Colowick, Kalckar, and Cori*, 343
Pyruvic acid formation, ingestion effect, *Bueding, Stein, and Wortis*, 793
Glucuronic acid: Blood, saccharoid relation, *Fashena and Stiff*, 21
Glycine: N-Ethyl-, hippuric acid synthesis, availability, *Abbott and Lewis*, 535
Precursors, *Abbott and Lewis*, 535
Glycogen: Liver, formation, alanine isomers, effect, *MacKay, Wick, and Barnum*, 183
Glycolic acid: Hippuric acid synthesis, availability, *Abbott and Lewis*, 535
Gonadotropic hormone: Chorionic, oxidation-reduction, *Bowman*, 293
Growth: Nutrition effect, *Lanford, Campbell, and Sherman*, 627
Factor. *See also* Rice Factor
Guanidinuria: *Greenblatt*, 791

H

Hemic acid: Ferri-, solubility and titration, *Morrison and Williams*, 461
Hemin: Solubility and titration, *Morrison and Williams*, 461
Hexokinase: System, activator, *Colowick and Kalckar*, 789
Hexosamine(s): Methylation, *Levene*, 29
Hippuric acid: Synthesis, N-ethylglycine and glycolic acid availability, *Abbott and Lewis*, 535
Histidine: Urine, determination, *Langley*, 255
—, pregnancy, *Langley*, 255
Homocysteine: S-(β-Amino-β-carboxyethyl)-, synthesis, *Brown and du Vigneaud*, 611
Homocystine: Choline and, relation, *Welch*, 173
Hydrogen: Tissue, transport mechanism, *Lockhart and Potter*, 1
Potter, 13

I

Insulin: Blood lipids, pancreatectomy and duct ligation, pancreatic juice ingestion with, effect, *Entenman, Chaikoff, and Montgomery*, 699
Intestine: Calcium chloride and calcium lactate solutions, changes, *Robinson, Stewart, and Luckey*, 283
Iron: Determination, photometric, *Pereira*, 417
Tissue catalase, effect, *Schultze and Kuiken*, 727

K

Ketone body: Liver fatty acid, diabetes, relation, *Stadie, Zapp, and Lukens,* 75
Kidney: Acetoacetate, carbohydrate synthesis, diabetes, *Stadie, Zapp, and Lukens,* 63
Metabolism, adrenalectomy effect, *Russell and Wilhelmi,* 713
Kinase: Hexo-, system, activator, *Colowick and Kalckar,* 789

L

Lactic acid: Metabolism, radioactive carboxyl carbon containing, *Conant, Cramer, Hastings, Klemperer, Solomon, and Vennesland,* 557
β-Phenyl-, tyrosine, conversion, *Moss,* 739
Radioactive, synthesis, *Cramer and Kistiakowsky,* 549
Lecithin: Purification, *Pangborn,* 545
Lipid(s): Blood, pancreatectomy and duct ligation with insulin, pancreatic juice ingestion effect, *Entenman, Chaikoff, and Montgomery,* 699
— serum proteins, electrophoretically separated, *Blix, Tiselius, and Svensson,* 485
Central nervous system, deposition, growth effect, *Fries, Entenman, Changus, and Chaikoff,* 303
-Free blood serum, electrophoresis, *Blix,* 495
Metabolism, pancreas external secretion, effect, *Montgomery, Entenman, Chaikoff, and Nelson,* 693
Entenman, Chaikoff, and Montgomery, 699
Liver: Acetic acid, non-formation, diabetes, *Stadie, Zapp, and Lukens,* 75
Cholesterol esterase, *Sperry and Brand,* 377
Fat, carbohydrate synthesis, diabetes, *Stadie, Zapp, and Lukens,* 63
Fatty acid, diabetes, ketone body relation, *Stadie, Zapp, and Lukens,* 75
—, pancreatectomy and duct ligation, pancreatic juice ingestion effect, *Montgomery, Entenman, Chaikoff, and Nelson,* 693
Glycogen formation, alanine isomers, effect, *MacKay, Wick, and Barnum,* 183
Lysine: Anemia, deaminized casein-produced, relation, *Hogan, Powell, and Guerrant,* 41

M

Malonic acid: Determination, *Christensen and Ross,* 101
Metabolism: Intermediary, diabetes, *Stadie, Zapp, and Lukens,* 63, 75
Metaphosphoric acid: Proteins and, combination, *Perlmann,* 707
Methane: Fermentation, *Barker,* 153
Methanobacterium omelianskii: Biochemistry, *Barker,* 153
Methionine sulfoxide: Taurocholic acid production, effect, *Virtue and Doster-Virtue,* 227
Methylthiazoline: 2-, properties, proteins, relation, *Linderstrøm-Lang and Jacobsen,* 443
Microorganism(s): Glucose-nonfermenting, oxidations, *Barron and Friedemann,* 593
Muscle: Chloride determination, *Dean,* 113

N

Naphthoquinone(s): Vitamin K_1-associated, determination, reduction-oxidation method, *Trenner and Bacher*, 745

Nuclease: Ribo-, crystalline, ribonucleic acid, action, *Allen and Eiler*, 757

Nucleic acid: Ribo-, ribonuclease, crystalline, action, *Allen and Eiler*, 757

Nutrition: Body calcium, effect, *Lanford, Campbell, and Sherman*, 627

O

Optical rotation: Protein hydrolysis study, *Winnick and Greenberg*, 429

Oxidation(s): Biological, *Barron and Friedemann*, 593

Oxygen: Cholesterol solutions, colloidal, effect, *Wintersteiner and Bergström*, 785

P

Pancreas: Secretion, external, lipid metabolism, effect, *Montgomery, Entenman, Chaikoff, and Nelson*, 693
Entenman, Chaikoff, and Montgomery, 699

Pancreatectomy: Blood lipids, duct ligation and, with insulin, pancreatic juice ingestion effect, *Entenman, Chaikoff, and Montgomery*, 699
Livers, fatty, duct ligation and, pancreatic juice ingestion effect, *Montgomery, Entenman, Chaikoff, and Nelson*, 693

Pancreatic duct: Blood lipids, ligation and pancreatectomy with insulin, pancreatic juice ingestion effect, *Entenman, Chaikoff, and Montgomery*, 699
Livers, fatty, ligation, pancreatectomy and, pancreatic juice ingestion effect, *Montgomery, Entenman, Chaikoff, and Nelson*, 693

Pancreatic juice: Blood lipids, pancreatectomy and duct ligation with insulin, ingestion effect, *Entenman, Chaikoff, and Montgomery*, 699
Livers, fatty, pancreatectomy and duct ligation, effect, *Montgomery, Entenman, Chaikoff, and Nelson*, 693

Papain: Chymo-, papaya latex, *Jansen and Balls*, 459
Crystalline, proteins, native and urea-denatured, action, comparison, *Lineweaver and Hoover*, 325

Papaya: Latex, proteinase, crystalline, *Jansen and Balls*, 459

Pea: Roots, carboxylase, *Horowitz and Heegaard*, 475

Peptidase: Poly-, yeast, isolation and properties, *Johnson*, 575

Peptide(s): *d*-, hydrolysis, enzyme, *Berger, Johnson, and Baumann*, 389

Phenol red: Absorption curve, blood serum proteins, effect, *Robinson and Hogden*, 239

Phenyllactic acid: β-, tyrosine, conversion, *Moss*, 739

Phosphoric acid: *See also* Metaphosphoric acid

Phosphorus: Blood, adrenalin injection effect, *MacVicar and Heller*, 643

Pituitary: Posterior, pressor principle, nature, amphoteric, *Cohn, Irving, and du Vigneaud*, 635

Polyhydroxyanthraquinone (s): Blood coagulation, vitamin K deficiency, effect, *Martin and Lischer*, 169

Polypeptidase: Yeast, isolation and properties, *Johnson*, 575
Polysaccharide(s): Blood serum proteins, electrophoretically separated, *Blix, Tiselius, and Svensson*, 485
Tubercle bacillus, avian, *Karjala and Heidelberger*, 189
Pregnancy: Urine histidine, *Langley*, 255
Pregnanediol: Urine, determination, *Astwood and Jones*, 397
Pressor principle: Pituitary, posterior, nature, amphoteric, *Cohn, Irving, and du Vigneaud*, 635
Protein(s): Blood serum, calcium and, relationship, alkalosis effect, *Yannet*, 409
— —, electrophoretically separated, lipids and polysaccharides, *Blix, Tiselius, and Svensson*, 485
— —, phenol red absorption curve, effect, *Robinson and Hogden*, 239
Carbon suboxide and, *Ross and Christensen*, 89
Christensen and Ross, 101
Ross and Green, 105
— — —, reaction, *Ross and Christensen*, 89
Hydrolysis, optical rotation in study, *Winnick and Greenberg*, 429
Metaphosphoric acid and, combination, *Perlmann*, 707
2-Methylthiazoline properties, relation, *Linderstrøm-Lang and Jacobsen*, 443
Native and urea-denatured, crystalline papain action, comparison, *Lineweaver and Hoover*, 325
Tuberculin, x-ray studies, *Spiegel-Adolf, Seibert, and Henny*, 503
Proteinase: Crystalline, papaya latex, *Jansen and Balls*, 459
Pyruvate: Urine, thiamine effect, *Harper and Deuel*, 233
Pyruvic acid: Blood, determination, acetoacetic acid effect, *Klein*, 311
Formation, glucose ingestion effect, *Bueding, Stein, and Wortis*, 793

Q

Quinone(s): Naphtho-, vitamin K_1-associated, determination, reduction-oxidation method, *Trenner and Bacher*, 745
Vitamin K_1-associated, determination, reduction-oxidation method, *Trenner and Bacher*, 745

R

Riboflavin: Blood, *Strong, Feeney, Moore, and Parsons*, 363
Determination, polarographic, *Lingane and Davis*, 567
Urine, *Strong, Feeney, Moore, and Parsons*, 363
See also Vitamin B_2
Ribonuclease: Crystalline, ribonucleic acid, action, *Allen and Eiler*, 757
Ribonucleic acid: Ribonuclease, crystalline, action, *Allen and Eiler*, 757
Rice factor: Carbohydrate component, *Stokstad, Almquist, Mecchi, Manning, and Rogers*, 373
Roentgen ray(s): Tuberculin proteins, studies, *Spiegel-Adolf, Seibert, and Henny*, 503

S

Saccharoid(s): Blood, *Fashena and Stiff*, 21
—, glucuronic acid relation, *Fashena and Stiff*, 21

Scarlet fever: Toxin, chemistry, *Barron, Dick, and Lyman*, 267
Sodium: Determination, *Consolazio and Dill*, 587
Steroid compound(s): Urine excretion, *Engel, Thorn, and Lewis*, 205
— —, males, *Engel, Thorn, and Lewis*, 205
Streptococcus: Hemolytic, growth, biotin relation, *Hottle, Lampen, and Pappenheimer*, 457
Sulfhemoglobin: Prosthetic group, *Haurowitz*, 771
Syphilis: Diagnosis, blood serum, tissue extract antigenic substance, chemical constitution, *Brown and Kolmer*, 525

T

Taurocholic acid: Production, *Virtue and Doster-Virtue*, 227
—, methionine sulfoxide effect, *Virtue and Doster-Virtue*, 227
Thiamine: Urine pyruvate, effect, *Harper and Deuel*, 233
See also Vitamin B_1
Thiazoline: 2-Methyl-, properties, proteins, relation, *Linderstrøm-Lang and Jacobsen*, 443
Tissue: Extracts, cell-free, glucose phosphorylation and oxidation, *Colowick, Kalckar, and Cori*, 343
Toxin: Scarlet fever, chemistry, *Barron, Dick, and Lyman*, 267
Tubercle bacillus: Avian, polysaccharides, *Karjala and Heidelberger*, 189
Tuberculin: Proteins, x-ray studies, *Spiegel-Adolf, Seibert, and Henny*, 503
Tumor: Arginase, *Greenstein, Jenrette, Mider, and White*, 795
Tyrosine: β-Phenyllactic acid conversion, *Moss*, 739

U

Urine: Ammonia, excretion, amino acid injection effect, *Bliss*, 217
Histidine, determination, *Langley*, 255
—, pregnancy, *Langley*, 255
Pregnanediol determination, *Astwood and Jones*, 397
Pyruvate, thiamine effect, *Harper and Deuel*, 233
Riboflavin, *Strong, Feeney, Moore, and Parsons*, 363
Steroid compounds, excretion, *Engel, Thorn, and Lewis*, 205
— —, —, males, *Engel, Thorn, and Lewis*, 205

V

Vitamin(s): B factors, determination, polarographic, *Lingane and Davis*, 567
B_1. *See also* Thiamine
B_2. *See also* Riboflavin
K, activity, *Fieser, Tishler, and Sampson*, 659
—, blood coagulation, polyhydroxyanthraquinones, effect, *Martin and Lischer*, 169
—, chemical constitution, *Fieser, Tishler, and Sampson*, 659
K_1, associated quinones and naphthoquinones, determination, reduction-oxidation method, *Trenner and Bacher*, 745
—, determination, reduction-oxidation method, *Trenner and Bacher*, 745

X

X-ray: *See* Roentgen ray

Y

Yeast: Fresh, anticomplementary factor, *Pillemer and Ecker*, 139
Polypeptidase, isolation and properties, *Johnson*, 575
Respiration, cytochrome *c* effect, *Carroll and Stier*, 787
